

# Instructions for Accessing the Rollins Wireless Network

## Before you come to campus...

- ✓ Make sure you have Anti-Virus Software installed on your computer and the virus definitions have been updated recently.
- ✓ Make sure you have run all critical Windows updates (if PC)

## When you arrive at campus...

1. Turn on your computer.
2. Make sure your wireless is turned on (some laptops will have a switch).
3. You will want to connect to “FoxDay”.
4. Open your internet browser.
5. In the window that loads, select **Guest** and enter your information.

The screenshot shows the Rollins College Network Access Control registration page. The header includes the Rollins College logo and "Network Access Control" with a "Powered by Bradford Networks" logo. The page is titled "REGISTRATION" and has a "WELCOME" section. It explains that the college requires clients to verify their PC meets network policies. It instructs users to fill out a form if they have a Novell/Groupwise account or to click a link to reset their password if not. Below this is a "DOWNLOAD" section with a form for User Name, Password, Local Phone #, Building (a dropdown menu), and Room Number (N/A). A "Download" button is at the bottom of the form. A link for "Instruction" is also present.

6. The Bradford security agent will download and scan your computer. You will be informed of a network outage and asked to close all browser windows.

7. You should then receive a message stating that

your wireless registration was successful. You can now open a browser window and use the internet.
